

MORE ON OUR FOUNDATION TREATMENT

DNA's Foundation treatment is meant to benefit everyone. We promise to always help you achieve your best skin and will do so with integrity & honesty.

We use professional-only skin care product lines & offer various modalities that allow us to really choose the best treatment protocols for your skins condition.

ADD ONS for the DNA Foundation Treatment

Extractions: We perform extractions at our discretion & are very careful when it comes to comedone removal. We use many different prep styles, so we can achieve the best results for your skin. If you *really* like to focus on removing blackheads during your treatment session, extra time can always be added when booking but they are always included.

Microdermabrasion: Quickly sloughs off your dead skin cells while improving the tone & texture of your skin after just one treatment. Also helps to reduce the appearance of dullness, fine lines & will boost circulation!

LED Phototherapy: We use some of the best equipment in the industry, and offer special packages for purchase if you're interested in the amazing benefits of recurring LED therapy treatments. Our add on is available so you can try the treatment out & see how your skin feels. Please refer to our website for more information or feel free to contact us with any questions!

Our professional products are free of toxic chemicals, SLS, phthalates, parabens, gluten, artificial colors, artificial fragrances, & will never be tested on animals.

PLEASE DO NOT BOOK THE FOUNDATION TREATMENT IF YOU ...

- have any active cold sores
- any contagious bacterial infections
- cancer patients - please bring doctor's note with you

PLEASE DO NOT BOOK MICRODERMABRASION IF YOU ...
